

IT'S ALL ABOUT INTEGRATION

POWERED BY KONGSBERG

KONGSBERG

WHEELHOUSE

Type approved operator station with configured video management software.

WHEELHOUSE TOP

External PTZ camera with dual sensor night vision, integrated thermal imaging camera for detecting hot objects in zero light.

BRIDGE WING

Fixed external camera used to monitor mooring of the ship and gangways.

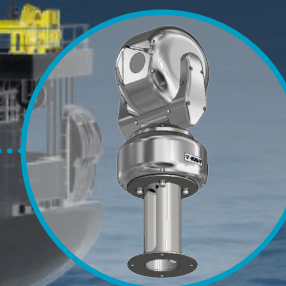

SCIENTIFIC LABORATORY

Operator station with configured video management software.

WINCH

Fixed external camera to monitor winch spooling operations.

WINCH CONTROL CABIN

External PTZ camera to monitor working deck operations.

ENGINE ROOM

Internal PTZ camera allows reduced manning; used for safety monitoring.

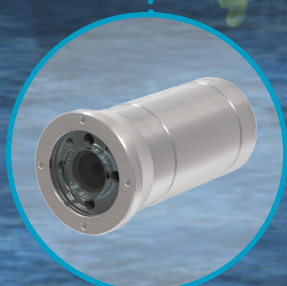

HANGAR

Fixed internal camera to view hangar operations.

HULL MOUNT / DROP KEEL

Subsea camera integrated with topside CCTV for aeration monitoring of hydro-acoustic systems. Smart sensors for understanding the environmental impact on marine life.

RESEARCH VESSELS

Research vessels operate in challenging environments; conducting complex tasks with a need for absolute precision, predictability and high efficiency. Whether scientific or commercial, these vessels require simple, effective and innovative solutions that streamline and simplify operations, enabling skilled crews to focus on achieving optimal results.

KM Marine CCTV is the perfect integrated solution.
